## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP02/07023

<ol> <li>Basis of the report</li> </ol>	rt
-----------------------------------------	----

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Description, Pages									
	1-3	I	as originally filed							
	Claims, Numbers									
	1-26	·	as originally filed							
			· ·							
	Drawings, Sheets									
	1/3-	3/3	as originally filed							
2.	With regard to the <b>language</b> , all the elements marked above were available or furnished to this Autholanguage in which the international application was filed, unless otherwise indicated under this item.									
	The	se elements were ava	ailable or furnished to this Authority in the following language: , which is:							
☐ the language of a translation furnished for the purposes of the international search (under Rule										
		the language of publ	ication of the international application (under Rule 48.3(b)).							
		the language of a tra Rule 55.2 and/or 55.5	nslation furnished for the purposes of international preliminary examination (under 3).							
3.	With regard to any <b>nucleotide and/or amino acid sequence</b> disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:									
		contained in the inte	rnational application in written form.							
		filed together with the	e international application in computer readable form.							
	☐ furnished subsequently to this Authority in written form.									
		furnished subsequer	itly to this Authority in computer readable form.							
	The statement that the subsequently furnished written sequence listing does not go beyo in the international application as filed has been furnished.									
		The statement that the listing has been furnit	ne information recorded in computer readable form is identical to the written sequence ished.							
4.	The	The amendments have resulted in the cancellation of:								
		the description,	pages:							
		the claims,	Nos.:							
		the drawings,	sheets:

## INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/EP02/07023

٧.

The subject-matter of the present claims is neither disclosed in nor fairly suggested by the state of the art on record.

Of the prior art documents relating to the pulse electrodeposition of a metal in nanocrystalline form US-A-6 080 504 is the most pertinent.

However, this document does not disclose a process having the combination of features specified in present claim 1, in particular the deposition rate and the  $t_{\rm off}$ - and the t<sub>on</sub>-time ranges for the cathodic and the anodic pulses respectively.

US'504 also does not disclose a micro component as defined in present claim 24.

The possibility of producing micro components having, inter alia, an equiaxed microstructure throughout the plated component which is relatively independent from the component thickness and structure justifies the acknowledgment of an inventive step.
